Python Backend Engineer | AI Engineer | FastAPI | PostgreSQL | REST APIs

SUMMARY

Python Backend Engineer with 2+ years of production experience designing scalable REST APIs, PostgreSQL-backed services, and full-stack web applications using FastAPI, React, Redis, Docker, and AWS. Built 80+ API endpoints, optimized database performance by 45%, and integrated LLM capabilities into enterprise products including HyphenView (50+ users). Strong in microservices, authentication, RBAC, and AI feature integration with LangChain and OpenAI. Open to relocation pan-India.

EXPERIENCE

Erasmith Pvt Ltd

Feb 2024 – Present

Python Backend Engineer / AI Engineer

Noida, India

- Developed and maintained 80+ REST APIs using FastAPI for analytics, workflow automation, authentication, and AI-powered enterprise features.
- Designed PostgreSQL schemas, query layers, and backend services; optimized queries and workflows, reducing dashboard load times by 45%.
- Built **HyphenView**, a FastAPI + PostgreSQL analytics platform with natural language querying; adopted by 50+ enterprise users with 65% adoption in the first quarter.
- Implemented JWT authentication, RBAC authorization, Redis caching, structured logging, and async request handling for production deployments.
- Built a FastAPI microservice for productivity analytics, KPI tracking, ownership assignment, and deadline alerts integrated with the internal React portal.
- Integrated OpenAI and Claude APIs into backend services; built RAG pipelines with LangChain, ChromaDB, and FAISS for document search and NLP features.
- Containerized services with Docker and deployed cloud-native workloads using AWS S3 for document storage and file management.

PROJECTS

EraDesk (Kanvance)

GitHub

- Built a full-stack internal productivity platform with 5-level RBAC, Excel import pipeline, real-time availability tracking, and polymorphic document linking.
- Implemented React 19 frontend, FastAPI backend, PostgreSQL schema with idempotent migrations, and reporting workflows.

HyphenView Text-to-SQL Analytics Platform (Erasmith)

Private Repo

- FastAPI + PostgreSQL backend enabling business users to query databases using natural language.
- Designed API layers for SQL generation, validation, and result formatting with OpenAI integration and ChromaDB vector search.
- **Repository:** Private NDA Repository (code not publicly available)

AI Shopping Assistant

GitHub

- Built FastAPI backend with PostgreSQL, REST endpoints, and OpenAI-powered recommendation logic.

- Deployed containerized services with Docker; **Live Demo:** e-comm-agent.vercel.app

AI Job Search Agent

GitHub

- Built async Python backend with LangGraph agent orchestration, tool-calling workflows, and embedding-based job matching.
- Implemented structured job scoring, vector search, and API-driven data pipelines for discovery and ranking.

EDUCATION

Galgotias College of Engineering and Technology

2020 – 2025

B.Tech Computer Science (AI Specialization)

Greater Noida, India

- Completed final year while working full-time as Python Backend / AI Engineer at Erasmith Pvt Ltd.

SKILLS

Backend: Python, FastAPI, Flask, REST APIs, AsyncIO, Microservices, Redis, JWT, RBAC, API Design

Databases: PostgreSQL, MySQL, MongoDB, SQL Optimization, Schema Design, Migrations

Cloud & DevOps: AWS, Docker, Docker Compose, CI/CD, Git, Linux, AWS S3

Frontend: React.js, JavaScript, TypeScript, Redux, HTML, CSS

AI Integration: LangChain, LangGraph, OpenAI GPT-4o, Claude, RAG, Vector Databases, ChromaDB, FAISS, Prompt Engineering, AI Automation
